

Basic Phonics Placement Assessment Directions

The Basic Phonics Placement Assessment is designed to provide information about appropriate placement in the K12 PhonicsWorks Program. Correct placement ensures that students will master early reading skills efficiently and without frustration.

The Basic Phonics Placement Assessment has four sections. After the student completes the first section, follow the directions for scoring the section and determining if the student is ready for the next section. Our goal is to help you find a starting point that is challenging, but not too difficult.

Test Administration Directions

Before administering the Basic Phonics Placement Assessment, please familiarize yourself with this manual and the assessment.

- 1) Take a moment to read and answer the assessment questions. You should test the student when he or she is well-rested and has adequate time to complete the assessment in a relaxed manner. The assessment should be administered in a well-lighted area that is comfortable for the student (e.g. dining room or kitchen table). The location should also be free from distractions and interruptions.
- 2) Talk with the student about the Basic Phonics Placement Assessment. The main purpose is to learn more about the student's phonics and reading skills. The student will be asked to identify beginning sounds, ending sounds, letter recognition, letter formation, words, sentences and correct spelling. The assessment results will help you choose where to place the student in the K12 Basic PhonicsWorks program.
- 3) Now go to the actual assessment that begins on page 2. The Answer Key can be found on page 6. For each section of the assessment, the instructions to be read to the student are located on the Answer Key. Read each question's instructions to the student.

Remember, you should let the student answer the questions without assistance. This assessment is designed to provide information on the student's phonics and reading skills.

If the student immediately self-corrects an incorrect answer, count the new answer as correct. If the student spends more than 20 seconds on any item, say "Let's try the next one."

Mark all responses as requested in the Answer Key and record the student's scores in the spaces provided.
